🌐 [Portfolio](#)

Full Stack & Systems Engineer with 2+ years of experience delivering scalable SaaS platforms, event-driven WebSocket architectures, and production Gen AI pipelines across Next.js 16, React 19, TypeScript, and Node.js. Sole-architected an enterprise LMS serving 3,000+ active users with 5 RBAC roles and 30+ subsystems, alongside delivering multi-tenant platforms (EMS, VisionPharma, client portals). Specializes in sub-2s Web Vitals, ORM/ODM data modeling (Prisma, Mongoose, PostgreSQL), and automated CI/CD with Vitest.

🔧 TECHNICAL SKILLS

Languages	JavaScript (ES6+) · TypeScript · SQL (PostgreSQL / MySQL) · HTML5 · CSS3
Frameworks / Libraries	Next.js 16 (App Router / RSC) · React 19 · Node.js · Express.js · Fastify · TanStack Query v5 · Redux Toolkit · Tailwind CSS · Firebase
Tools / Platforms	PostgreSQL · MongoDB Atlas · Redis · Prisma ORM · Mongoose (ODM) · Docker · Dexie.js (IndexedDB) · GitHub Actions (CI/CD) · Vercel
Testing	Vitest · Jest · React Testing Library · Playwright · MSW · Postman · Lighthouse CI
Architecture & Concepts	System Design & Micro-frontends · Generative AI & LLM Pipelines (Claude / OpenAI / Gemini) · ORM / ODM Data Modeling & Indexing · Role-Based Access Control (RBAC) · Performance Tuning (Web Vitals / LCP / FCP) · RESTful APIs & WebSockets · PWA & Service Workers

💼 PROFESSIONAL EXPERIENCE

Full Stack Developer

July 2025 – Present

Visiontech Group — Hyderabad (Full-time)

- Next.js · TypeScript · Fastify · Prisma / Mongoose · Firebase · React Query · Generative AI · REST APIs
- Architected and sole-built an enterprise LMS serving 3,000+ active users, implementing 5 distinct user roles (admin, instructor, learner, manager, reviewer) and 30+ modular subsystems, delivering 2 weeks ahead of schedule.
 - Designed optimized Firestore & MongoDB document schemas with compound indexing and cached Next.js API routes, reducing average API response times by 40% and cutting page load times to sub-2.5s.
 - Pipelined Claude & OpenAI LLMs with custom prompt engineering and structured JSON validation, reducing instructor course authoring time by ~60% with zero schema parsing failures.
 - Collaborated in cross-functional Agile sprints to ship the company EMS, VisionPharma, and commercial client web portals with Next.js, Tailwind CSS, and Vitest suite (Lighthouse >92).

Frontend Developer

Feb 2025 – June 2025

Viacerta Abroad — Remote (Full-time)

- Next.js · React.js · Firebase · REST APIs · Tailwind CSS
- Modernized customer-facing platform with Next.js App Router and React Server Components, improving First Contentful Paint (FCP) by 35% and boosting mobile session duration by 25%.
 - Authored an autonomous CMS blog engine with dynamic updates, empowering non-technical teams to publish content without developer intervention — reducing turnaround from 2 days to same-day.
 - Integrated Firebase for real-time state synchronization and optimized data fetching with React Query, eliminating redundant network requests by 50%.

Teaching Assistant — Full Stack Web Development

June 2024 – July 2024

AlmaBetter — Remote (Internship)

- JavaScript · React.js · Node.js · MongoDB · REST APIs
- Mentored a cohort of 20+ aspiring developers in MERN stack development; guided 85% of mentees to build and deploy full-stack capstone applications on schedule.
 - Conducted weekly code reviews and live debugging sessions, improving cohort project modularity and test coverage scores by 30%.

🔑 KEY ENGINEERING PROJECTS

ReactForge — 100-Task Frontend Machine Coding & Engineering Lab

[🔗 Live Demo](#) | [📁 Repository](#) | [📄 Case Study](#)

Problem: Frontend candidates and engineers lacked a hands-on, interactive workbench to practice real-world machine coding rounds and complex React 19 architecture.

- Next.js 16 (App Router) · React 19 · TypeScript · Gemini 2.0 Flash AI · MongoDB Atlas · Dexie.js (IndexedDB) · Tailwind CSS
- Created an interactive browser workbench with 100 categorized machine coding challenges across 3 career tracks (SDE-1, SDE-2, Senior) with live state manipulation and 100% strict TypeScript.
 - Integrated a real-time Gemini 2.0 Flash AI Interview Coach with anti-tamper server-enforced rate limiting in MongoDB Atlas (100 msgs/day) and Dexie.js offline-first IndexedDB persistence.

CryptoDash Pro — Institutional-Grade Real-Time Trading Terminal

[🔗 Live Demo](#) | [📁 Repository](#) | [📄 Case Study](#)

Problem: Active traders lacked a low-latency intelligence terminal featuring real-time streaming, automated AI market analysis, and zero-downtime rate-limit resilience.

- Next.js 16 (App Router) · TypeScript · Generative AI / LLMs · Redux Toolkit · TanStack Query v5 · Binance WebSockets · PWA / Service Workers
- Delivered an institutional 3-column trading terminal with Binance WebSocket streams for sub-50ms live ticker updates, Redux master state, and a resilient server proxy resolving 429 rate-limit blocks.
 - Constructed an AI market intelligence pipeline leveraging LLM APIs with structured prompts to synthesize live order book feeds into automated volatility summaries and sentiment digests.

🎓 EDUCATION

Bachelor of Engineering (B.E.)

2020

Electronics and Telecommunication Engineering

Dr. Babasaheb Ambedkar Marathwada University

Analytical foundation in signal systems, data communication, and algorithmic problem-solving applied to distributed web systems.

🏆 CERTIFICATIONS

Full Stack Web Development

2024

AlmaBetter (Professional Certificate) · [🔗 Verify](#)

★ KEY DIFFERENTIATORS

- Production Gen AI Specialization: Enterprise prompt pipelines with 100% deterministic JSON output parsing
- Full-Lifecycle Product Ownership: Schema modeling, RBAC security, API middleware, and automated CI/CD
- Measurable Performance Gains: 40% API latency reduction, 50% network payload pruning, Lighthouse >92
- Active Open-Source Author: Maintained production codebases with comprehensive live case studies
